

Hey Students!

Are you a high school student interested in getting paid to build workplace skills and explore career paths this summer?

Do you like to tinker, fix things, cook, or do other activities that require you to solve problems?

AFRL NM
Career **STREAM**
is the opportunity
for you!

What is Career **STREAM**?

A paid summer apprenticeship where you work with college mentors and other apprentices to solve problems in science, technology, engineering, and math (STEM).

Along the way, you will learn skills to help you succeed in any career you choose.

The ideal apprentice shows creative thinking & motivation but may not have access to opportunities to explore STEM content & careers.

Adult Advocates

Do you know a student who has shown innovative ways to solve problems in or out of the classroom?

- Reach out to those students and encourage them to apply
- Offer to be a reference on their application form
- Help students put together a pitch, if they are asked to create one

Career STREAM

Who can be a Student Apprentice?

Demographics →

- Juniors or Seniors in high school, from targeted demographic groups
- Students who have an interest but may not have decided about whether STEM is for them
- Students who like creative problem solving and fixing things
- Students who want to learn more about workplace skills and careers in technology
- Students who are responsible and can finish what they start as part of a full time summer job

Student apprentices must belong to at least one of the following categories:

- Race and ethnic minorities historically underrepresented in STEM
- Military-connected
- Low-income family
- Students with disabilities
- Female learners
- First-generation college students
- Students with English as a second language
- Students in rural or other Federal targeted outreach schools, such as Title 1 or high-need school districts

How can I apply?

This year's program will be virtual – our Mentors will be from NM Tech & UNM.

Laptops and hot spots will be provided, as needed.

Applications Due by 7 May 2021

Why Career STREAM?

- 6-8 week summer job / 40 hrs per week - \$10.85 per hr / begins in June 2021 and ends in August 2021 / student apprentices are paid through 2-3 stipends over the summer
- Student apprentices get to see how they fit into STEM careers and understand how their cultural and everyday problem-solving experiences can serve as a foundation for their future success.
